

# HIGH QUALITY MECHANICAL SEALING BY BENCO

[WWW.BENCOSEALS.COM.AU](http://WWW.BENCOSEALS.COM.AU)

# OUR PROFILE

Benco Seals is a 2nd generation family owned business dedicated to providing its clients with unparalleled service, quality assurance and product reliability.

We are an innovative team of Engineers, Tradesmen and Technicians, with the capability and experience to provide our customers with excellent products, services and support for their rotary shaft equipment sealing needs.

Backed by a global support team of Manufacturers and Suppliers with over 40 years of experience in the mechanical sealing industry, Benco Seals has the ability to source, manufacture, design and supply a wide variety of shaft sealing systems.

**UNPARALLELED SERVICE,  
QUALITY ASSURANCE &  
PRODUCT RELIABILITY.**

# WHY CHOOSE BENCO?

## **RESPONSIVENESS**

Delivering products, repairs and service same day or overnight.

## **EXPERIENCE**

Key team members each with over a decade of experience in the mechanical sealing and associated industries.

## **CUSTOMER FOCUSED**

Close knit team of dedicated engineers, tradesmen and technicians offering unparalleled service and support.

## **COST EFFECTIVENESS**

Balance of local manufacturing capability with worldwide cost efficient sourcing.

## **QUALITY DRIVEN**

Striving to provide unbeatable service, quality assurance and product reliability.

## **INNOVATIVE**

Dedicated to making it easier and quicker to identify and supply the right seal for the right application.

## **PRIDE**

2nd generation Australian owned and operated company.

# MECHANICAL SHAFT SEALS

Benco Seals offers a complete line of component seals, available in an extensive range of types, sizes, configurations and material combinations to suit almost any application.

Benco Seals stocks a wide range of OEM replacement seals, and if we don't have a direct replacement seal on the shelf, we can provide you with an alternative seal design at a fraction of the cost, with the correct material combination to suit your application.

We also offer a large and versatile range of Cartridge Seals that can be customized to suit your requirements.

Benco Seals can even advise on an improved seal design and material combination to make the seal easier to install, add reparability, increase seal life or even make it less expensive.

## *AN EXTENSIVE RANGE OF TYPES, SIZES, CONFIGURATIONS & MATERIAL COMBINATIONS*

## GLAND PACKING

We offer a full range of standard sized stuffing box packing in various grades to suit almost any application requirements.

Most of our Packing is available by the metre or by the box (8m), and we also offer an additional service to cut and form "ready to install" Gland Packing Rings to suit almost any sized shaft and stuffing box.

## SEAL RECONDITIONING

The team at Benco Seals is dedicated to professionally repair all brands and styles of Mechanical Seals to like-new condition, focusing strongly on quality, responsiveness and cost effectiveness.

Our Brisbane based service and repair facility is equipped to handle any mechanical seal repair requirement and our in-house capabilities significantly reduce overall repair time.

In addition, our experience and knowledge in the repair and reconditioning of mechanical seals, gives our customers the confidence of knowing their seal will be reconditioned correctly every time.

**PROFESSIONALLY  
REPAIR ALL BRANDS  
AND STYLES OF  
MECHANICAL SEALS**

## SPECIALTY SEALS DESIGNED AND MANUFACTURED

At Benco Seals, we approach Mechanical Sealing problems from multiple disciplines in order to come up with the best solutions available.

Whether it's an application with limited stuffing box or sealing area, or a harsh environment application where seal failure is a common occurrence, Benco Seals can advise and assist with new seal designs and material selections to optimise seal life and simplify maintenance.

# LOCAL CAPABILITIES

## EX-STOCK SUPPLY

Huge range of ex-stock seals offering thousands of different type, size and material combinations.

## RECONDITIONING

All types and makes of mechanical seals, primarily designed to save costs on replacement seals or when new parts are not available.

## URGENT SERVICE

For breakdowns, or when a seal is required same day, we offer an urgent supply or repair turn-around, usually at no extra charge.

## MANUFACTURING

High quality machining, specialising in stainless steel, from one-off requirements to large volume runs.

## GENERAL LAPPING

Components and parts in a wide variety of materials that require a flat precision finish.

## ENGINEERING & DESIGN

Customised seals and components to solve Mechanical Sealing problems.

## CARBON PRODUCTS

Carbon machining in a wide variety of grades to suit any application.

## DIAMOND GRINDING

Surface and O.D. grinding of hard faced Seal components.

## O-RINGS & GASKETS

Available in all materials and sizes.

## ENGINEERING PLASTICS

Machining of components for high-wear or harsh chemical applications.
